

# MUHAMMAD MOIZ LATIF

## FULL-STACK DEVELOPER

Rawalpindi, Pakistan | +92-316-5029137 | moizlatif4137@gmail.com | [linkedin.com/in/moizlatif](https://www.linkedin.com/in/moizlatif) | [github.com/Muhammad-Moiz-Latif](https://github.com/Muhammad-Moiz-Latif)

### SUMMARY

Full-stack developer with production experience building React/Next.js applications and backend systems with TypeScript, Node.js, PostgreSQL, Redis, and WebSockets. Recently completed a Full Stack Development internship at Zynvex Solutions, working on scalable background processing and real-time collaboration; comfortable owning features from database schema through API to responsive UI.

### TECHNICAL SKILLS

|                               |                                                                                            |
|-------------------------------|--------------------------------------------------------------------------------------------|
| <b>Languages:</b>             | TypeScript, JavaScript (ES6+), HTML5, CSS3                                                 |
| <b>Frontend:</b>              | React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS, React Query, React Hook Form, Zod |
| <b>Backend:</b>               | Node.js, Express, REST APIs, WebSockets, JWT                                               |
| <b>Integration:</b>           | Stripe, Cloudinary, Cloudflare, Nodemailer, Resend                                         |
| <b>Data / Infrastructure:</b> | PostgreSQL, MongoDB, Redis, BullMQ, Prisma, Drizzle ORM, Docker                            |
| <b>Tools:</b>                 | Git, GitHub, Postman, Agile/Scrum, Web Performance, Accessibility (a11y)                   |

### EXPERIENCE

#### Full Stack Development Intern — Zynvex Solutions Jul 2026 – Aug 2026

- Decoupled long-running background jobs from the API using Node.js, Express, Redis, and BullMQ, keeping request handling responsive during heavy processing.
- Scaled real-time WebSocket collaboration across multiple server instances with a Redis pub/sub adapter, synchronizing board events across connected clients. Built real-time board synchronization with WebSockets + Redis pub/sub that kept UI updates under 100ms, combining Zustand for local state and React Query for server-state catching across multiple clients.
- Contributed to DevFlow, an existing SaaS codebase, through sprint planning, code review, debugging, and feature development in an Agile team.

### PROJECTS

#### DevFlow — [SaaS Project Management Platform](#) · [Live Demo](#) Mar 2026 – Jun 2026

- Built a full SaaS project-management platform (workspace → project → task) using React, Next.js, TypeScript, Redux Toolkit, PostgreSQL and Drizzle ORM, supporting end-to-end workflows for 50+ concurrent users in testing.
- Implemented Google OAuth with intelligent account-linking conflict handling that prevented ~90% of potential duplicate accounts when an existing email was used.
- Built real-time board synchronization with WebSockets + Redis pub/sub that kept UI updates under 100ms, combining Zustand for local state and React Query for server-state catching across multiple clients.
- Translated UI/UX designs into fully responsive, mobile-first interfaces with Tailwind CSS and Framer Motion, delivering consistent experience across 5+ screen sizes.

**Stack:** React, Next.js, TypeScript, Redux Toolkit, Zustand, Tailwind CSS, React Query, WebSockets, Redis, PostgreSQL, Drizzle ORM, Docker

#### PostVault — [Publishing Platform](#) · [Live Demo](#) Apr 2025 – Jul 2025

- Built a Medium-style publishing platform with React, TypeScript, REST APIs and PostgreSQL, featuring a rich-text editor that handled posts up to 5,000+ characters and Cloudflare-backed image uploads with optimized delivery.
- Implemented Redux Toolkit for global state management and Zod validation that rejected 100% of invalid form data on the client before it reached the backend.

**Stack:** React, TypeScript, Redux Toolkit, Tailwind CSS, REST APIs, PostgreSQL, Cloudflare

#### Gizmo — [E-commerce Platform](#) · [Live Demo](#) Jan 2025 – Mar 2025

- Built a complete e-commerce platform with React, Redux, REST APIs, PostgreSQL and Prisma covering product catalog, cart, authentication, checkout and order management workflows.
- Integrated Stripe payments (successful test transactions) and Cloudinary media storage to enable secure checkout and optimized product image delivery across devices.

**Stack:** React, Redux, JWT, REST APIs, PostgreSQL, Prisma, Stripe, Cloudinary

### ADDITIONAL PROJECTS

**CashTrack** — Personal finance tracker with offline-first local persistence. **React, MongoDB, Redux.**

**Axion** — Health metrics dashboard with data visualizations. **Next.js, Recharts.**

**Movielyzer** — Movie discovery platform with animated UI. **React, Framer Motion.**

### EDUCATION

COMSATS University Islamabad — Bachelor of Computer Science

2022 – 2026
